

Customer Satisfaction Metrics: ENLASO Provides Innovative Solutions to Problems and Requests

100% of customers agree or somewhat agree that ENLASO offers innovative solutions to problems and requests.

The 2011 ENLASO® customer satisfaction survey consisted once again of our standard 14 questions to explore our customers' perceptions about working with ENLASO, as well as the addition of a few open ended questions. ENLASO values innovation highly and we are pleased to see that our customers feel we provide creative solutions to their problems and requests. In addition, scores were higher this year for understanding project needs.

The survey took approximately 10 minutes to complete. With each question, respondents also had the option to share additional information and feedback with us.

For the fifth consecutive year, ENLASO used standardized survey questions in order to best determine our customers' perspective regarding ENLASO's efforts to meet or exceed their expectations. Using the same questions each year allows us to effectively compare the results with the findings from previous years.

The annual customer satisfaction survey is designed to help ENLASO meet the quality objectives as outlined in our ISO 9001:2008 quality policy. Our quality policy provides the framework for ensuring customer satisfaction and supports these four objectives:

- Consistent, high quality localization services to our customers,
- Continual improvement to all aspects of our quality management system,
- The incorporation of technology in our services,
- Competitive pricing for services.

The data provided to us through the annual customer satisfaction survey allow us to accurately identify opportunities for improvement in our quality system.

ENLASO greatly appreciates the feedback and open communication provided by the survey respondents. We highly value all feedback and Management has carefully reviewed all comments from our customers who participated in the survey to identify possible opportunities for improvement for follow-up in the near future by our quality coordination team.

Please do not hesitate to contact Yves Lang or myself directly if you would like to share additional feedback or comments.

Sincerely,
