## ENLASO's Oil, Gas, and Energy Language Solutions

Documentation Translation and Localization

Web site Localization

Software Localization

Multilingual User Interface Localization

Marketing Localization

Cultural Consulting

Internationalization and Localization Consulting and Engineering

Dedicated QA Testing Department

Specialized Teams

Project Management

Dedicated Account Management

ISO 9001:2008 Certified Language Solutions

Energy solutions, from the use of oil and natural gas to the alternative energy solutions in use or proposed, are significant to the world economy. To put this in perspective, in November, 2014, a barrel of oil costs \$74.50. In 2013, the United States used 18.9 million barrels of oil per day (mbd), while the combined consumption for Europe and Eurasia reached 18.6 mbd. Other significant consumers include China at 10.7 mbd, the Middle East at 8.5 mbd, Japan at 4.5 mbd, and Russia at 3.3 mbd. The US became the world's biggest oil producer in 2014, surpassing Russia and Saudi Arabia. Factoring in the costs and revenue generation for natural gas consumption, construction of power plants (gas, coal, nuclear, thermal, and hydropower), as well as research, the large economic impact of this industry is easily understood.

While the developed world still relies predominantly upon non-renewable fossil fuels for energy production, the need for renewable energy continues to grow steadily as a result of decreased supply combined with the ecological impact of fossil fuel consumption. Renewable energy from solar, wind, biomass, hydrogen, geothermal, ocean, and hydropower along with nuclear energy help reduce the world's reliance on fossil fuels. All of these energy sources represent large, economically powerful industries, that offer business opportunities worldwide.

## Oil, Gas, and Energy Project Expertise

ENLASO has the experience to assist you with any oil, gas, and energy- related project, including the translation and localization of:

- Technical manuals, operating instructions, maintenance information, and training programs (computer-based training and other training media).
- Web sites, marketing materials, and PowerPoint presentations.
- Software, multimedia projects, and online help systems.
- Legal and business support contracts, human resource policies, and legislation documents.
- Documentation pertaining to exploration, production, refining, commercialization, and much more.

F: (208) 672-8522

Main Production Office  
in Boulder, CO with  
additional offices on East  
and West Coasts.

## Translation and Localization Services into Over 100 Languages

ENLASO has established a successful track record for localization services to a wide variety of energy sector companies, with proven experience in as many as 109 languages for a single project. As an ISO-certified language solutions provider we understand that the accurate translation and localization of oil, gas, and energy related business intelligence requires the efforts of experts with appropriate linguistic and subject-matter knowledge. ENLASO only works with experienced professional linguists who are formally educated native speakers of the assigned target language. All of our linguists must pass a rigorous qualification process and have a demonstrated record of excellence in the subject matter.

## Dedicated Project Teams

ENLASO's proven expertise in translating and localizing content for regulated industries ensures that we are able to deliver the highest quality translations, on time, and within the agreed upon budget. We believe that the key to the successful execution of any oil, gas, and energy related localization and translation project depends on a strategic team approach that melds account management and project management. As such, ENLASO assigns a Senior Project Manager to your account who oversees a team of highly skilled localization professionals assembled to meet your project needs.

## ISO 9001:2008 Certified Language Service Provider

ENLASO is an ISO 9001:2008 certified language service provider with robust quality and customer service processes. With stringent processes at every organizational level and project milestone, ISO 9001 certification recognizes ENLASO's rigorous linguistic selection process, employee training, customer-focused account and project management, and customer service practices. In the eyes of international regulatory bodies, ENLASO's ISO 9001 certified processes are equivalent to having an in-house translation and localization department.
